

PET LAMPS

Solar-Brite™

Solar-Brite™ UVB + Heat Lamps help prevent and treat Metabolic Bone Disease in captive reptiles by providing essential UVB and heat in a single, efficient unit. They support healthy appetite, proper growth, and vibrant coloration.

Nite-Brite™

Nite-Brite™ Red Bulbs emit a gentle red light, letting you observe nocturnal pets without disturbing their natural behavior. They also provide a safe, 24-hour heat source to keep your pets warm, comfortable, and healthy.

Clear-Brite™

Clear-Brite™ Basking Lamps provide a reliable heat source ideal for tropical and desert reptiles. They help maintain proper temperature gradients for healthy thermo regulation and overall well-being.

Lunar-Brite™

Lunar-Brite™ Lamps emit minimal visible light, mimicking natural moonlight for reptiles. They're ideal for nighttime viewing and provide gentle warmth.

Day-Brite™

Day-Brite™ Color Enhancing Bulbs use a neodymium coating to bring out the natural colors of reptiles. These full-spectrum bulbs simulate sunlight, providing both light and gentle warmth for basking. They help create a natural environment that supports your pet's health and well-being.

Dome Fixture

Dome fixtures securely hold and direct lighting for reptiles and exotic pets. Their durable design and reflective interior maximize light and heat distribution. Compatible with various bulbs, they help create an ideal environment for your pet's health and comfort.
